## Communities

### Regional Chapters

- Bulgaria
- Italy
- Peru
- Turkey
- Romania
- Croatia
- Mexico
- Russia
- Vietnam
- **Ukraine**

# Aims and Objectives

- Raising awareness and providing information about the editorial activity, journal management, academic and research integrity, ethical policy, editing policy, reviewing process etc
- Increasing accessibility and transparency of information regarding editorial activity in Ukrainian
- Conducting workshops/conferences and other events with scientists' participation in order to discuss problems and barriers of successful integration
- Undertaking an information campaign about EASE in Ukraine
- Organization of events, trainings, summer school, conference for publishers, managing editors, publishing editors and academic editors responsible for managing editorial boards, ~~either directly (as chair) or indirectly~~, authors, young scientists, practitioners, publishers
- Consulting journals about longer-term strategies of development—including plans and proposals to develop existing titles and for acquisitions and new launches
- Educational and informational activities for authors

The mission of scholarly publishing, publishing ethics and standards

### HARMONIZATION OF STRUCTURING REQUIREMENTS FOR UKRAINIAN SCIENTIFIC ARTICLES ON SOCIAL COMMUNICATIONS WITH THE EASE GUIDELINES

**BACKGROUND.** Why is this study important? First of all, because Ukrainian scientists are increasingly integrating into the global scientific space and they need clear guidelines for the proper presentation of the results of their study. Such guidelines can be the EASE Guidelines for Authors and Translators of Scientific Articles to be Published in English.

**Evolution of the academic writing in Ukraine**

**OBJECTIVE.** The aim of the study is to compare approaches to writing abstracts and structuring scientific articles in Ukrainian scientific journals on social communications with the requirements of the EASE Guidelines.

**METHODS.** The sample consisted of 50 articles from the last issues of 10 Ukrainian prestigious scientific journals on social communications (5 articles from each journal). In the first stage of the study, conceptual content analysis of the abstracts was performed using the descriptors **Background, Objectives, Methods, Results, Conclusions**, and the scientific articles using such descriptors as **Introduction, Methods, Results, Discussion according to the IMRAD-format**. In the second stage, content-related analyses of the structured articles were performed to determine the correspondence of the content to the names of the selected headings and the dependence of the content quality of the article on the quality of its structuring.

**RESULTS.** The study confirmed our hypothesis that most of the analyzed articles do not meet the requirements of the EASE Guidelines.

Section	Percentage
Background	66 %
Objectives	56 %
Methods	48 %
Results	90 %
Conclusions	54 %

It was found that in the **Abstract** section background is presented in 66 % of the articles, objectives – in 56 %, methods – in 48 %, results – in 90 %, conclusions – in 54 %.

Section	Percentage
Introduction	84 %
Methods	46 %
Results	98 %
Conclusions	36 %

Analysis of the articles structure showed that **Introduction** is presented in 84 % of articles, **Methods** – in 46 %, **Results** – in 98 %, **Discussion** – only in 36 %.
