

data sharing made easy with figshare

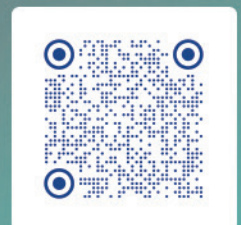

Figshare is a leading repository platform for making research outputs of all kinds citable, shareable, and discoverable.

With Figshare, you can:

- Quickly and easily make your research outputs available in a controlled, curated way
- Get a DataCite Digital Object Identifier (DOI) for persistent citing
- Track impact with usage metrics plus citation counts and altmetrics
- Link funding information and related publications directly to the research output on Figshare
- Assign open reuse licenses

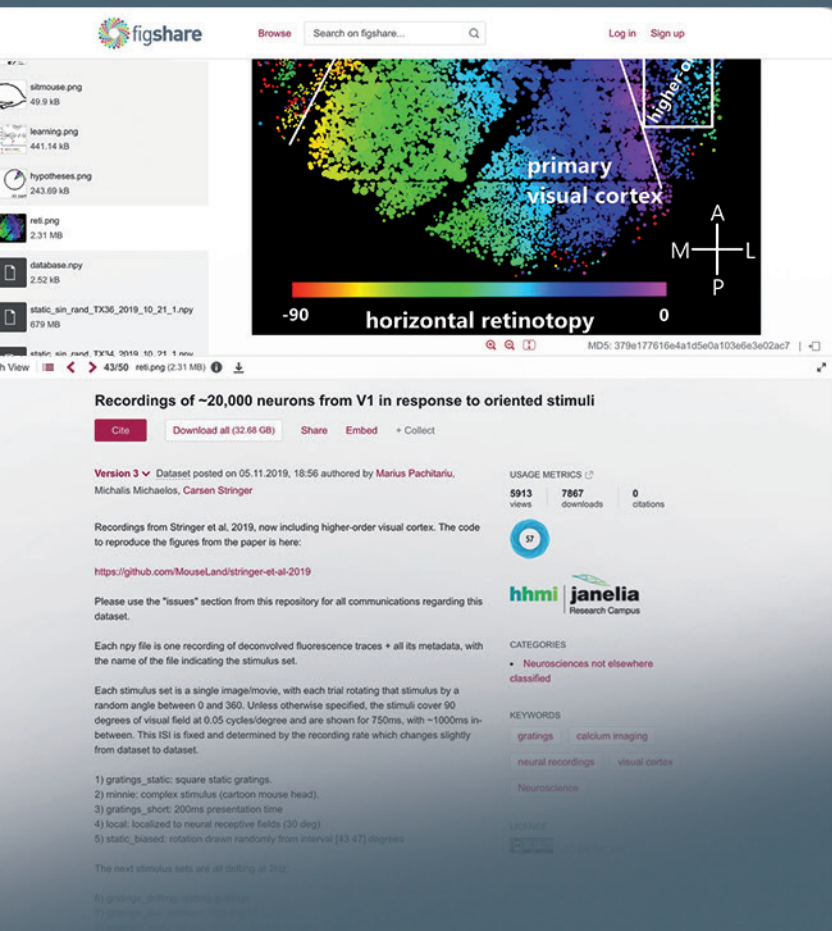

- research data
- software
- white papers
- policy documents
- ...and more

Help your organization make its research outputs more open and impactful. **Get in touch at info@figshare.com** or **by scanning the QR code.**

Figshare has endorsed the TRUST principles for Digital Repositories, the FAIR principles for open data, is committed to open access, data integrity, and preservation, and is ISO27001 certified.

Figshare also meets the NIH's Desirable Characteristics for Data Repositories and is part of the NIH's Generalist Repository Ecosystem Initiative (GREI).

The Howard Hughes Medical Institute's Janelia Research Campus launched a Figshare repository to store and share their data focused on multidisciplinary, collaborative, biomedical research. Since their launch in 2017, they've had over 600,000 views and almost 83,000 downloads of the research in their repository.

They've also made use of Figshare's curation services to enhance the metadata and discoverability of their outputs.
