Diamond Open Access Standard (DOAS) is a comprehensive multidimensional framework that helps ensure the quality and transparency of governance, processes and workflows in Diamond Open Access publishing. DOAS defines required and desired quality criteria across seven quality dimensions.

FUNDING

Diamond OA business model
Sustainability
Editorial independence

EDITORIAL MANAGEMENT, EDITORIAL QUALITY AND RESEARCH INTEGRITY

Editorial bodies
Editorial quality
Peer review
Research integrity

TECHNICAL SERVICE EFFICIENCY

Publishing infrastructure
Interoperability and metadata
Collaboration

LEGAL, OWNERSHIP, MISSION AND GOVERNANCE

Ownership
Governance
Relations with service providers

DOAS helps Diamond OA journals strengthen their role as reliable knowledge providers by:

Promoting openness in governance and funding

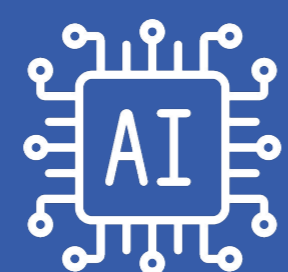

Placing transparency and research integrity at the heart of scholarly publishing

Strengthening trust through transparent policies and editorial practices

Integrating open science practices in scholarly publishing to ensure that research is reproducible

Requiring responsible AI use where AI is applied

VISIBILITY, COMMUNICATION, MARKETING AND IMPACT

Presence
Communication
Analysis

OPEN SCIENCE

Open policies
Authors' rights, Intellectual Property Rights and licensing
Repositories

EDIB, GENDER AND MULTILINGUALISM

EDIB and gender
Accessibility
Multilingualism

How to use DOAS

Publishers can use the DOAS brochure and/or the online self-assessment tool to check compliance with the best practice in Diamond OA publishing.

Editorial teams can use the DOAS Guide for Journals to analyse their current practices against DOAS requirements and identify areas for improvement.
